## **DETAILED ACTION**

### ***Repeated Rejections***

1. The claim objection of claims 2 and 48 in the office action dated March 2, 2005 is repeated for the reasons previously of record.
2. The 35 U.S.C. 112 2<sup>nd</sup> paragraph rejection of claims 3 – 6 in the office action dated March 2, 2005 is repeated for the reasons previously of record.
3. The 35 U.S.C. 103 rejection of claims 1 – 12, 14 – 20, 45 – 58, 60 – 78 and 80 – 87 over Gregory et al. in view of Bonk et al. and Ekman et al. in the office action dated March 2, 2005 is repeated for the reasons previously of record as the Applicant's arguments are unpersuasive.
4. The 35 U.S.C. 103 rejection of claims 13, 59 and 79 over Gregory et al. in view of Bonk et al., Ekman et al. and Yuasa et al. in the office action dated March 2, 2005 is repeated for the reasons previously of record as the Applicant's arguments are unpersuasive.

### ***Response to Arguments***

5. Applicant's arguments filed September 2, 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on

Art Unit: 1772

obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). Bonk discloses that it is known in the art to use isocyanate-based foam matrix as part of parts of seats (Column 5, lines 60 – 66); therefore, it would be obvious to one of ordinary skill in the art to combine the coated channels of Bonk with the air channels of Gregory et al.

In response to Applicant's argument that Ekman et al. does not teach the provision of an air impermeable layer in a channel disposed at the seating surface, Ekman et al. teaches an air channel and passageway surface and less than the complete seat surface being coated with substantially fluid and air impermeable material (Column 5, lines 11 – 13), which is in part of the seat surface (Figure 5, #94). There is no clear definition in the specification of "at the seat surface". Even though the channel is at the back of the seat surface, it is still at the seat surface.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1772

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
